DETAILED ACTION

Any rejection not reiterated is hereby dropped.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/20/2007 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1655

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 75-84 are rejected under 35 U.S.C. 102 (b) as being anticipated by JP 408143442 (see the entire translation supplied by applicant especially the claims, paragraph 8, abstract).

JP '442 teaches a water extract of soybeans used to treat eczema. Whole soybeans are ground and water is added and then the extract is filtered. The ground matter is heated but to a temperature which could read on 5 °C.

Applicant argues that JP '442 does not teach that the soybean in JP '442 was crushed or broken but if one looks at page 3, claim 6 of the translation of JP '442, it is clear that the soybeans were ground which would crush the soybean and that the soybean was heated anywhere from 5-100 °C. Thus, it could have been heated to only 5 °C which would have not denatured the protein.

Claims 75-84 are rejected under 35 U.S.C. 102 (a) as being anticipated by JP 410226642 (abstract).

JP '642 teaches an extract of soybeans used to treat psoriasis. The extract can be applied in an ointment form, see abstract.

Applicant argues that the genistein has to be denatured in order to be ingested by humans but upon closer inspection of JP '642 it is clear that the extract is applied topically, i.e. as an ointment. Thus, it does not have to be ingested by humans as applicants argue.
